**Subject:** \*\*\*Time Sensitive - Trail Spraying Sept 2

**Trail Spraying – Sept 2 -5**

Maintenance has advised us that, weather permitting, they will spray the trails with a pre-emergent and non-selective weed control. This should kill the remaining weeds on the trails. The crews plan to start on **Tuesday morning, September 2**, and continue if not completed. If it looks like rain, the crews will delay the application to a day with more favorable weather conditions. They will start on the trail from Roller Coaster Rd and Kershaw, and follow the loop around County Line Rd, Royal Troon Dr., White Cliff Way, then back up Roller Coaster Rd to the maintenance building. When done with the big loop, they will start on the west side of Roller Coaster near the school and down King's Deer Point.

Please keep pets off the trails while the crews are spraying, and allow the maintenance crews the time and space needed to accomplish this task.

Owners whose properties contain trails are encouraged to help the community by deweeding the trails throughout the growing season. Also, when mowing, we ask that you refrain from blowing the clippings on the trails, as this spreads the seeds and promotes weed and vegetation growth on the trails.
