Subject: Playground and Trail Spraying - September 5

Playground and Trail Spraying – September 5

Maintenance has advised us that, weather permitting, they will spray the playground area and remaining trails with a pre-emergent and non-selective weed control. This should kill the remaining weeds and prevent their regrowth. The crews plan to complete this work on **Friday morning, September 5**, and if the weather does not cooperate, then they will perform the spraying on the next available day. Spraying has been completed on the trail from Roller Coaster Rd and Kershaw, and following the loop around County Line Rd, Royal Troon Dr., White Cliff Way, then back up Roller Coaster Rd to the maintenance building. The remaining section to be completed tomorrow is west of the school and down to the far end of King's Deer Point.

Please keep pets off the trails while the crews are spraying, and allow the maintenance crews the time and space needed to accomplish this task.

Owners whose properties contain trails are encouraged to help the community by deweeding the trails throughout the growing season. Also, when mowing, we ask that you refrain from blowing the clippings on the trails, as this spreads the seeds and promotes weed and vegetation growth on the trails. Further, please don't blow your clippings on the streets. Let's all work together to keep our community clean.

Our King's Deer email system and owner login for the website are temporarily down. Meanwhile, you may temporarily send an email to this address: kingsdeerhoa@gmail.com
I will turn on the autoresponder when the regular king's deer email address is again working.
